

1. Industry Classifications 2015-16

The task of analysing the RDAWEP regional economy requires a better understanding of the region's industries. More detailed and accurate data are needed about the nature of key industries and their constituent sectors. In order to enhance the description of the regional economy, RDAWEP and the EPLGA commissioned EconSearch to prepare industry-based economic data from 2012-13.

The manner in which the region's industries are described is critical to economic analyses. This paper:

- Describes the prevailing conventions for classifying industries,
- Identifies the industry and sector definitions in the EconSearch data, and
- Describes how these conventions and definitions have been modified to better suit the analysis of industries in the RDAWEP region.

Industry Classifications

Industry data packages use the Australian and New Zealand Standard Industrial Classification (ANZSIC) system. The ANZSIC was revised in 2006 to capture new and emerging economic activities such as Internet publishing and broadcasting, the provision of Internet access services, computer retailing, and the manufacture of communication equipment.

Australian Bureau of Statistics (ABS) Census data are usually provided at a 19-industry level using the following ANZSIC categories:

| No. | INDUSTRY |
|-----|---|
| A | Agriculture, Fishing and Forestry |
| B | Mining |
| C | Manufacturing |
| D | Electricity, Gas, Water and Waste Services |
| E | Construction |
| F | Wholesale Trade |
| G | Retail Trade |
| H | Accommodation and Food Services |
| I | Transport, Postal and Warehousing Services |
| J | Information, Media and Telecommunications |
| K | Financial and Insurance Services |
| L | Rental, Hiring and Real Estate services |
| M | Professional, Scientific & Technical Services |
| N | Administrative and Support Services |
| O | Public Administration and Safety |
| P | Education and Training |
| Q | Health Care and Social Assistance |
| R | Cultural and Recreational Services |
| S | Other Services |
| X | Inadequately Stated/Not described |

Table 1: ANZSIC 19-Industry Level Classification.

This listing is suitable for the analysis of industries in most Australian regions; however, it is problematic for analysing the RDAWEP regional economy for several reasons.

- Agriculture, fishing and forestry are amalgamated as a single *primary production* industry, with one set of data provided for the three sectors.
- This makes it impossible to extract agriculture, fishing, and forestry specific data (such as the level of employment in each sector).
- The RDAWEP region has a relatively minor forestry industry, whereas agriculture and fishing are important and high profile employment and economic drivers.
- Separate data for agriculture and fishing are required for analysing the RDAWEP economy.
- Fishing industry data also include data for aquaculture, which is a key regional industry.
- However, aquaculture specific data cannot be identified using the ABS 19-level ANZSIC categories.

The ANZSIC system also does not identify tourism and food as industries in their own right. This is problematic for analysing the regional economy because tourism and food are two of the region's fastest emerging business sectors, with substantial potential for future growth and economic impact.

Industry Rankings

The 19-industry level ANZSIC system also creates problems for ranking the region's industries.

Based on employment and using the 19-industry level ANZSIC system; the agriculture, forestry and fishing industry was the region's largest employing industry in 2015-16, providing 3,921 jobs and 15.5% of regional employments.

However, if agriculture, fishing and aquaculture are analysed as separate industries (which can be achieved using 78-industry level data); the ranking of the region's industries by employment changes substantially. Under this scenario, in 2015-16:

- Health care and social assistance was the region's largest employing industry providing 3,466 jobs and 13.7% of regional employment.
- Agriculture was the region's fourth largest employer, providing approximately 2,600 jobs and 10% of regional employment.
- Fishing and aquaculture (which are high profile regional industries) did not rank in the top ten listing of regional employers – for details see **Paper 2: Regional Employment 2015-16**.

EconSearch Data Packages

In order to provide a better understanding of the region's industries, EconSearch has prepared data at a 20 and 78-industry level for the RDAWEP region and each of the eleven LGAs.

The 20-industry level data listing adds a new industry category to the ABS 19-level ANZSIC, to cover the ownership of dwellings. This is a notional industry sector designed to impute a return to the State's housing stock. The total value of output in this sector is an estimate of rent earned on leased dwellings, and imputed rent on the balance of owner-occupied dwellings.

The industry definitions, and the relationship between the 20 and 78-industry levels, are fully detailed by EconSearch in an appendix to this paper. The industry specifications are provided in context with recognised National Input and Output sector categories – see **Appendix 1: Industry Sector Definitions**.

However, for the purpose of providing better industry descriptions, EconSearch 78-industry level data are used predominantly in RDAWEP planning documents. The procedure for modifying and using the 78-level data is described below.

Modification of the 78-industry Level Data

EconSearch data for the primary production area (i.e. Agriculture, Fishing and Forestry) are provided in industry sectors in **Table 2**. Agriculture specific data can be identified by removing aquaculture and fishing (hunting and trapping) data, and treating these sectors as separate industries, as indicated in **Table 3**.

| NATION INPUT OUTPUT SECTORS | RDAWEP and COUNCIL 78 SECTORS | RDAWEP and COUNCIL 20 SECTORS |
|--|--|--------------------------------------|
| Sheep, Grains, Beef and Dairy Cattle | Sheep | Agriculture, Forestry and Fishing |
| | Grains | |
| | Beef Cattle | |
| | Dairy Cattle | |
| Poultry and Other Livestock | Poultry | |
| | Pigs | |
| | Other Livestock | |
| Other Agriculture | Wine Grapes | |
| | Vegetables | |
| | Fruit and Nuts | |
| | Other Agriculture | |
| Aquaculture | Aquaculture | |
| Forestry and Logging | Forestry and Logging | |
| Fishing, Hunting and Trapping | Fishing, Hunting and Trapping | |
| Agriculture, Fishing and Forestry Support Services | Agriculture, Fishing and Forestry Support Services | |

Table 2: EconSearch 78 and 20 Industry Classifications.

| NATION INPUT OUTPUT SECTORS | RDAWEP and COUNCIL 78 SECTORS | RDAWEP and COUNCIL INDUSTRIES MODIFIED STRUCTURE |
|--|--|---|
| Sheep, Grains, Beef and Dairy Cattle | Sheep | Agriculture |
| | Grains | |
| | Beef Cattle | |
| | Dairy Cattle | |
| Poultry and Other Livestock | Poultry | |
| | Pigs | |
| | Other Livestock | |
| Other Agriculture | Wine Grapes | |
| | Vegetables | |
| | Fruit and Nuts | |
| | Other Agriculture | |
| Forestry and Logging | Forestry and Logging | |
| Agriculture, Fishing and Forestry Support Services | Agriculture, Fishing and Forestry Support Services | |
| Aquaculture | Aquaculture | |
| Fishing, Hunting and Trapping | Fishing, Hunting and Trapping | Fishing |

Table 3: RDAWEP Modified Industry Structure.

This modification has the consequence that data for forestry and logging, and for agriculture, fishing and forestry support services, will be attributed to the agriculture industry. This should be of minimal consequence because these industry sectors are relatively minor and should not skew the agriculture industry data to a concerning degree. The application of this modified industry structure can be demonstrated using regional employment data.

When analysing employment, data about the number of jobs, percentages and FTE positions for the aquaculture and fishing industries are clearly identified, and sector data can be summed to produce employment totals for the agriculture industry – see **Table 4**.

| INDUSTRY | INDUSTRY SECTOR | TOTAL EMPLOYMENT | | | |
|--|-------------------------------|------------------|--------------|-------------|--------------|
| | | (Jobs) | (%) | FTE | (%) |
| Agriculture | Sheep | 739 | 2.9 | 964 | 3.8 |
| | Grains | 1,323 | 5.2 | 1,760 | 7.0 |
| | Beef Cattle | 389 | 1.5 | 482 | 1.9 |
| | Dairy Cattle | 0 | 0 | 0 | 0 |
| | Poultry | 4 | 0 | 4 | 0 |
| | Pigs | 5 | 0 | 6 | 0 |
| | Other Livestock | 0 | 0 | 0 | 0 |
| | Wine grapes | 9 | 0 | 5 | 0 |
| | Vegetables | 11 | 0 | 13 | 0.1 |
| | Fruit and Nut | 9 | 0 | 6 | 0 |
| | Other Agriculture | 4 | 0 | 6 | 0 |
| | Forestry and Logging | 4 | 0 | 4 | 0 |
| Ag., Forestry and Fishing Support Services | 102 | 0.4 | 125 | 0.5 | |
| Agriculture Sub-total | | 3,101 | 2,599 | 10.0 | 3,375 |
| Aquaculture | Aquaculture | 701 | 2.8 | 506 | 2.0 |
| Fishing | Fishing, Hunting and Trapping | 622 | 2.5 | 432 | 1.7 |

Table 4: RDAWEP Agriculture, Aquaculture, and Fishing Industry Employment 2015-16.

Agriculture, Fishing and Forestry Services

The ANZSIC 78-industry level provides information about Agriculture, Fishing and Forestry Support Services, which indicates that 102 jobs were provided by this sector during 2015-16. Under the modified industry structure proposed above, these jobs are allocated to the agriculture industry.

Advice was sought from EconSearch about whether it is possible to identify the number of support services jobs in each of the agriculture, forestry and fishing sectors, so that they could be allocated to the respective industries.

EconSearch has estimated that about 5% of the employment is for forestry support services; 56% is for shearing services, and that about 40% of the jobs are shared among other agriculture and fishing services. However, EconSearch advised that the ANZSIC system does not provide sufficient useable data to make a reliable distinction as to which sectors are receiving the support services.

To overcome this lack of detail, support services data are allocated to the agriculture industry. *This means that agriculture data might be slightly over-stated.*

Application of the Modified Industry Model

This modified industry model is used for analysing EconSearch data at both the regional and Council level, and forms the basis for discussing regional industries in RDAWEP planning documents.

The 78-industry data listing has the advantage that it will enable Councils to identify the employment levels and economic contribution of different agriculture industry sub-sectors. For example, the data in **Table 4** clearly demonstrate that grain is the largest employing sector in the agriculture industry, providing just over half (50.9%) of the region's agricultural jobs in 2015-16.

EconSearch Industry Data - Other Issues

Processed Seafood Manufacturing – Implications for the Analysis of Fishing and Aquaculture Industry Data

Under ANZSIC conventions, data about the processing of numerous food products are listed under the manufacturing industry. This includes the processing of seafood, meats, dairy products, fruit and vegetables, grains and cereals, and some bakery products – see **Appendix 1**.

A consequence of this ANZSIC convention is that data about the fishing and aquaculture industries (such as employment levels, and the value of exports) may appear lower than expected, because processed seafood product data is presented under manufacturing, rather than as part of the fishing and aquaculture industries.

For example, In **Table 4**, the number of aquaculture jobs is given at 701, and 622 jobs are identified for the fishing industry. Some people might think these job numbers are low, given the importance of the aquaculture and fishing industries to the regional economy. However, in 2015-16, an additional 205 jobs were identified under processed seafood products within manufacturing, bringing the collective number of jobs attributable to the fishing and aquaculture industries to 1,528.

Tourism Industry

The ANZSIC system does not identify tourism as a separate industry and consequently does not produce tourism industry specific data. This is due to the unique nature of the tourism industry.

Tourism-related activity is diverse, and tourists consume the products and services that are generated by a range of industries defined under the ANZSIC system – e.g. hospitality services consumed by tourists are provided under ANZSIC's accommodation and food services industry. Tourists also consume products and services generated by other industries, such as retail trade; information, transport, cultural and recreational services.

The problem is that these goods and services are also consumed by local people as well as tourists, but the proportion consumed by each client sector is unknown. Only the portion consumed by visitors can be attributed to tourism industry activity – e.g. in 2015-16 1,543 jobs were provided in the region's accommodation and food services industry, but only some of these jobs directly service tourists, and the number cannot be identified from the employment data.

Tourism industry data are consequently derived from a range of other sources, including research undertaken by the South Australian Tourism Commission, and Regional Tourism Satellite Accounts (TSA) produced by Tourism Research Australia (TRA). TSA evaluate tourism industry activity and performance within a national accounting framework, and measure the direct and indirect impacts of tourism on regional economies.

While TSA data provide an understanding of the region's tourism industry, caution needs to be exercised when comparing these data with data provided for other industries under ANZSIC, because it runs the risk of double counting. For example, the tourism industry cannot be ranked against other ANZSIC industries on the basis of employment, because tourism-related jobs would be included in the job data for the ANZSIC industries. The risk of double counting also applies to data about the tourism industry contribution to Gross Regional Product (GRP).

As the ANZSIC system does not identify tourism as a separate industry, the EconSearch data packages provided to Councils exclude tourism industry data. Tourism industry expenditure is the exception, and this is provided by EconSearch as a component of the region's exports.

Tourism expenditure is a measure of the value of sales of goods and services consumed by visitors to the region. EconSearch has estimated this expenditure from a number of sources, including primary data from TRA, detailed TSA data for both domestic and international visitor expenditure, and datasets of tourism expenditure from SA tourism profiles (which include estimates for domestic day, domestic overnight and international visitor expenditure).

The EconSearch estimates involve a number of adjustments to develop concordance between SA tourism regions, the RDAWEP region and the region's eleven LGAs. Further adjustments were made to make the data consistent with accounting conventions used in national, State, and regional economic modelling.

These data are provided in your data packages on an industry sector basis for the region and each LGA.

Food Industry

The ANZSIC system also does not identify food as an industry in its own right. However, food production, processing and export is a fast growing regional business sector.

As with tourism, the region's food sector is very broad and incorporates products and services generated by the agriculture, aquaculture and fishing industries; as well as food processing undertaken within the manufacturing industry under the ANZSIC system.

EconSearch therefore cannot provide data specific to the region's food industry. This data complication will be addressed where appropriate in future RDAWEP planning documents.

Summary

Industry-based data modelling in Australia is subject to the use of agreed conventions and industry definitions as determined by the ANZSIC system. EconSearch has therefore prepared data for the RDAWEP region and each LGA in a form that complies with ANZSIC.

However, the ANZSIC system makes it difficult to provide appropriate analysis and descriptions of the region's agriculture, fishing, aquaculture, tourism and food industries.

In view of the importance of the agriculture, fishing and aquaculture industries to the regional economy, the ANZSIC system has been slightly modified to distinguish agriculture, fishing and

aquaculture specific data. This is possible due to the provision of 78-industry level data by EconSearch.

The modification separates fishing and aquaculture data from agriculture data; and agriculture sector data is summed to produce data for the agriculture industry as a whole. This modification is applied in RDAWEP planning documents and related reports.

Data concerning the tourism and food industries will be addressed on a case-by-case basis in future RDAWEP reports, with appropriate clarification provided where applicable.

Appendix 1: INDUSTRY Sector Definitions

A uniform sector specification comprised of 78 and 20 intermediate industry sectors was applied to the RDAWEP region and all the region's LGAs. Regional economic data at the 20-sector and 78-sector level. The sector specifications in terms of the national input-output sectors are detailed below.

| National I-O 111 Sectors | RDAWEP & Councils, 78 Sectors | RDAWEP & Councils, 20 Sectors | |
|--|---|-------------------------------------|-----------------|
| 101 Sheep, Grains, Beef and Dairy Cattle | 1 Sheep | 1 Agriculture, Forestry and Fishing | |
| | 2 Grains | | |
| | 3 Beef Cattle | | |
| | 4 Dairy Cattle | | |
| 102 Poultry and Other Livestock | 5 Poultry | | |
| | 6 Pigs | | |
| | 7 Other Livestock | | |
| 103 Other Agriculture | 8 Winegrapes | | |
| | 9 Vegetables | | |
| | 10 Fruit and Nuts | | |
| | 11 Other Agriculture | | |
| 201 Aquaculture | 12 Aquaculture | | |
| 301 Forestry and Logging | 13 Forestry and Logging | | |
| 401 Fishing, hunting and trapping | 14 Fishing, Hunting and Trapping | | |
| 501 Agriculture, Forestry and Fishing Support Services | 15 Agriculture, Forestry and Fishing Support Services | | |
| 601 Coal mining | 16 Coal Mining | 2 Mining | |
| 701 Oil and gas extraction | 17 Oil and Gas Extraction | | |
| 801 Iron Ore Mining | 18 Iron & Non-ferrous Ore Mining | | |
| 802 Non Ferrous Metal Ore Mining | | | |
| 901 Non Metallic Mineral Mining | 19 Non Metallic Mineral Mining | | |
| 1001 Exploration and Mining Support Services | 20 Exploration and Mining Support Services | | |
| 1101 Meat and Meat product Manufacturing | 21 Meat and Meat Product Manufacturing | | 3 Manufacturing |
| 1102 Processed Seafood Manufacturing | 22 Processed Seafood Manufacturing | | |
| 1103 Dairy Product Manufacturing | 23 Dairy Product Manufacturing | | |
| 1104 Fruit and Vegetable Product Manufacturing | 24 Fruit and Vegetable Product Manufacturing | | |
| 1105 Oils and Fats Manufacturing | 25 Oils and Fats Manufacturing | | |
| 1106 Grain Mill and Cereal Product Manufacturing | 26 Grain Mill and Cereal Product Manufacturing | | |
| 1107 Bakery Product Manufacturing | 27 Other Food Product Manufacturing | | |
| 1108 Sugar and Confectionary Mfg | | | |
| 1109 Other Food Product Manufacturing | | | |
| 1201 Soft Drinks, Cordials and Syrup Manufacturing | 28 Other Beverages | | |
| 1202 Beer Manufacturing | 29 Beer Manufacturing | | |
| 1205 Wine, Spirits and Tobacco | 30 Wine, Spirits and Tobacco Mfg | | |
| 1301 Textile Manufacturing | 31 Textiles, Clothing and Footwear Mfg | | |
| 1302 Tanned Leather, Dressed Fur and Leather Product Manufacturing | | | |
| 1303 Textile Product Manufacturing | | | |
| 1304 Knitted Product Manufacturing | | | |
| 1305 Clothing Manufacturing | | | |
| 1306 Footwear Manufacturing | | | |
| 1401 Sawmill Product Manufacturing | 32 Sawmill Product Manufacturing | | |
| 1402 Other Wood Product Manufacturing | 33 Other Wood Product Manufacturing | | |

| National I-O 111 Sectors | RDAWEP & Councils, 78 Sectors | RDAWEP & Councils, 20 Sectors | |
|--|--|--|--|
| 1501 Pulp, Paper and Paperboard Manufacturing | 34 Pulp, Paper and Paperboard Manufacturing | 3 Manufacturing (cont.) | |
| 1502 Paper Stationery and Other Converted Paper Product Manufacturing | 35 Paper Stationery and Other Converted Paper Product Manufacturing | | |
| 1601 Printing (including the reproduction of recorded media) | 36 Printing (including the reproduction of recorded media) | | |
| 1701 Petroleum and Coal Product Manufacturing | 37 Petroleum and Coal Product Manufacturing | | |
| 1801 Human Pharmaceutical and Medicinal Product Manufacturing | 38 Pharmaceutical & Other Chemical Product Manufacturing | | |
| 1802 Veterinary Pharmaceutical and Medicinal Product Manufacturing | | | |
